

FastFind PLB

The Fastfind and Fastfind Plus Personal Locator Beacons feature the same advanced technology as found in our range of EPIRBs. Designed using miniaturised components to fit into an ergonomically styled compact casing, both versions employ a simple three-stage manual operation and feature user replaceable battery packs for use in temperatures as low as -20°C .

Carrying the Fastfind could not be simpler, both versions are supplied with a lanyard and optional carry case to enable the user to keep the PLB with them at all times. These latest advanced products from McMurdo have been designed to provide professional and recreational mariners, fishermen, light aircraft pilots and those involved in outdoor adventure activities with the very best chance of being found without delay in the event of an emergency.

Intended for use within the maritime, aviation and land environments where permitted by national administrations.

- Built-in 12 parallel channel GPS receiver (Fastfind PLUS only)
- Visual indication of GPS acquisition
- Internal GPS allows position updates
